The medical perspective of cupping therapy: Effects and
Apr 30, 2018 · 1. Introduction. Cupping therapy is an ancient method of treatment that has been used in the treatment of a broad range of conditions. 1 There are many types of cupping therapy; however, dry and wet cupping are the two main types. 2 Dry cupping pulls the skin into the cup without scarifications, while in wet cupping the skin is lacerated so that blood is drawn into the...

Oral and maxillofacial pathology - Wikipedia
Oral and maxillofacial pathology refers to the diseases of the mouth ("oral cavity" or "stoma"), jaws ("maxillae" or "gnath") and related structures such as salivary glands, temporomandibular joints, facial muscles and perioral skin (the skin around the mouth). The mouth is an important organ with many different functions. It is also prone to a variety of medical and dental...
